

# Extra Service and equipment for vibratory deburring

Equipment for PERS Vibra-Line deburring machines.

Here is a selection of equipment that can be easily and simply combined with vibration equipment, either before during or after the process.

	Application	Product	Benefit
	Optimeret styreskab med touchskærm og hastighedsregulering af vibrationsmaskinen.	<b>Vibra - Touch 5,5"</b> Color screen that controls frequency converter in connection with regulating the speed of the vibration motor. Sizes: 1.5-15 Kw motors	Optimal engine performance during the process. Regulation of the discharge flow.
	Discharge of magnetic work pieces	<b>Magnet Separator</b>	It focuses on the efficient machining and separation exclusively of magnetic work pieces. The automated workflow can be adjusted and monitored via the convenient system control.
	Discharge table for separation of work pieces from media and compound.	<b>Vibra-Sep 1100-2200</b> Vibra-Sep is a series of standard discharge tables which can be combined with the machines. Sizes, length: 1100 to 2500 mm	Simple standard table for effectively separating items from media, either during discharge or when sorting media into sizes.
	Drying and polishing of items from vibrations machines.	<b>Vibra-Dry</b> Vibra-Dry will after deburring, receive wet items to be dried Size: 200-600 L.	Dryer or surface polished parts, depending on the media.
