

Ultrasonic

Ultrasonic cleaning is an effective cleaning of complicated items.

Ultrasonic cleaning is a process that uses ultrasound to agitate a fluid. The ultrasound can be used with just water or an appropriate solvent for the item to be cleaned and the type of soiling.

	Application	Product	Benefit
	Effective cleaning of small parts.	Ultrasonic 15 L.	Ultrasonic cleaners remove contaminants without abrasion, harsh scrubbing, or high-pressure sprays, making them ideal to clean even the most delicate parts.
	Effective cleaning of small parts.	Ultrasonic 30 L.	Ultrasonic cleaners remove contaminants without abrasion, harsh scrubbing, or high-pressure sprays, making them ideal to clean even the most delicate parts.
	Effective cleaning of small parts.	Ultrasonic Cleaner	Ultrasonic cleaners remove contaminants without abrasion, harsh scrubbing, or high-pressure sprays, making them ideal to clean even the most delicate parts.
